Glory
group

Glory is the name of a diversified set of affiliated companies that share the common principles of innovation and service. Glory has excellent management team, whom working in different manufacturing and engineering sector for last 37 years. starts its journey in 2007 by taking over two industries, Poles and Concrete Limited and ARC Construction Company. These two companies play a vital role in developing of our country's infrastructure, especially in electrification and gas transmission sector. Our engineering and Construction capabilities have continued to expand with the introduction of Glory Engineering Limited in 2006, a high carbon steel Pin and Steve factory which is catering our in-house demand for Jute Industry as well as for almost all jute mills over the country. In the year 2010 the company diversified its business by setting up a composite jute industry in the name of Glory Jute Limited. Beside these Glory Group has kept its continuous development by setting up new spinning mill in textile sector as Glory Spinning Limited of 40,000 Spindle capacity plant near capital city Dhaka. While we hope to have vigorous growth in our business, we are keen to see that it happens in a sustainable and harmnious manner with one's natural and social climates.

Today glory group is running successfully with its seven sister concerns.
They are -

Glory Jute Limited
Glory Poles Limited
Glory Spinning Limited
Arc Construction Company
Glory Engineering Limited
Poles And Concrete Limited

Our teams of skilled professionals strive hard towards quality of the product and enable us as to maintain the quality-focused approach. All our provided products are manufactured from quality assured basic material, which is procured from the trusted resources of the market. We have developed a highly advanced and modern infrastructure facility at our premise to manufacture our products in a good production rate. Owing to our best quality products, we have created a huge client base across the nation.

****amounts are given in millions****

Glory Spinning Limited

In modern fashion technology, the demand for perfection begins right at the birth of the raw material, permeates through every single process, till the highly discerning customer dons the finished garment. It is this demand for perfection that has spurred the growth of an organization and its corporate philosophy.

GSL is a multi-unit, multi-interest business group with a wide range of industrial activity, an organization that has founded its evolution on value-based commercial practice. Glory Spinning Limited was established in 2010 with an initial capacity of ring 40,000 spindles. The company produces high quality Cotton Yarn. The annual rated production capacity is 7 million kg's of NE 20/1 to Ne 40/1 Carded Ring Yarn. The plant is located in Purura, Valuka, Mymensingh. The main machinery of the plant is a new European brand machine. The company believes in maintaining reputation in the industry sectors, customer and among financial institutions. A strong presence has been established by delivering world-class quality products, an efficient marketing network backed by a team of professionals has further added to the company's performance and reputation. The product mix is flexible; we are able to manufacture different products as per the demand of our valued customers. Our production capacity is 7,000,000kg per annum.

Those who can furnish clients with the best quality, competitive price, excellent customer services and prompt delivery can only survive in the market. Gloria Spinning Limited takes immense pride in perceiving its role as the comprehensive architect of every single yarn that its produces.

Poles And Concrete Ltd

Poles And Concrete Limited is one of the largest manufacturers of Spun Pre-stressed Concrete (SPC) Pole in Bangladesh. We work with Rural Electrification Board (REB), Bangladesh Power Development Board (PDB), Dhaka Electric Supply Authority (DESA), Dhaka Electric Supply Company (DESCO) Barandra Multipurpose Development Authority (BMDA) and other concern authorities in their electrification activities in Bangladesh. Poles And Concrete Limited's journey began in early 2003. The industry is located at KDA Shiromoni I/A on plot no R-5, R-6(Part), R-8, R-9, R-12 and R-13 over 5.0 acres of land. The site is adjacent to the Khulna - Jessore High way. The River "Bhairab" flows only 450 meters away from the works. The plant is equipped with all the necessary infrastructural facilities including water, power, transport, communication, labor supply, basic raw materials and market.

PCL is one of the founders of the pre-stressed spun concrete technology and has developed it over 50 years to get highest strength, durability and quality. The pre-stressed spun concrete poles from PCL have the following main advantages:

- High strength concrete with a compacted dense surface
- No corrosion and high resistance against chemical, environmental and climatic effects
- Best weight – performance ratio
- Good nature behavior even by reaching the ultimate load bearing capacity
- Full monitored production process with state of the art quality control methods.
